How to use

Backup your wallet data file and save in other safe place - other folder, USB drive, etc.-. see location bellow

The default installation folders and files of Ravencoin wallet coin is quite similar to almost all

Your default wallet data files are located at

C:\Users\YourUser\AppData\Roaming\Raven and is called wallet.dat

Unzip all the folders and files provided in

Blockchain_Raven_Itisa_20210307_0811pmUTC-3.zip

in a temporary directory you choose

We provided the folders **blocks** and **chainstate** with all the blocks and structure of the Raven Blockchain at this moment

Copy and replace all the same folders that are located at

C:\Users\YourUser\AppData\Roaming\Raven

with what we provided and you unzipped

After the end of copy and replace

run your GUI Raven wallet (Raven-qt.exe) and wait until full synchronization of your wallet at the present

Be patient until blockchain is upload in memory and/or your swap file (a few min)

If you need:

download wallet

at https://github.com/RavenProject/Ravencoin/releases/download/v0.15.99.0/windows-x86_64.zip

More info at <https://ravencoin.org/>

run Raven-qt.exe until it generates the folder

C:\Users\yourUser\AppData\Roaming\Raven

Close your GUI wallet

Backup your wallet.dat file to other safe media but keep the original generated there
